

Business Management Policy

Oxford Hydrotechnics is committed to provide a rigorous framework for our corporate governance to meet the requirements of ISO9001 & ISO14001. We continually strive to provide the best working environment for our employees and provide the best service possible to our customers.

Oxford Hydrotechnics is aware of its' responsibilities to the environment and will work to ensure the environmental impact from our activities and products are monitored and wherever possible, reduced. We will work closely with suppliers, stakeholders and external agencies to ensure, wherever possible, that products are sourced from ethical, sustainable sources and will endeavor to reduce the environmental impact of our activities.

Our activities are developed to ensure Oxford Hydrotechnics comply with current legislation and those that relate to its environmental aspects.

Additionally, Oxford Hydrotechnics seeks to prevent pollution, minimise waste and mitigate negative impact on the environment.

Policy Actions:

- Corrective and preventative actions providing a service that has no negative environmental impact.
- Ensure products and services meet statutory and mandatory requirements.
- Nurture a "right first time" attitude to client services.
- Offer a competitive and cost-effective option for clients within our markets whilst maintain the highest possible quality standards.

These objectives will be achieved through continual monitoring and the setting of improvement targets.

This Policy will be reviewed under the management review process and will be communicated to all employees via the office notice board, as well as being displayed on the company website for the general public.
